KRUS

"KRUS in figures" – the new booklet of KRUS as an example of good practice

Thanks to international cooperation within the ENASP network, the Agricultural Social Insurance Fund (KRUS) has developed and published a new statistical brochure containing the most important data showing the scale of tasks performed by the institution.

With The brochure "KRUS in figures" presents the data concerning the statutory activities of Agricultural Social Insurance Fund with particular emphasis on preventive activities.

In recent years, KRUS has recorded a significant fall in the number of accidents. This is due to the increased awareness of threats in agriculture and the consistent implementation of preventive objectives by the field units of the Fund. These activities are reinforced by the Fund's participation in the international campaign Vision Zero.

The aim of the publication is to make the Reader better acquainted with Agricultural Social Insurance Fund and the idea of a separate social insurance system for farmers.

The brochure is available in Polish and English.

We invite you to read the brochure on
