SVLFG

New web app for seasonal workers

The Social Insurance for Agriculture, Forestry and Horticulture (SVLFG) offers a new web app with multilingual information on safe and healthy work for seasonal workers.

Entrepreneurs and employees also want to work healthily and safely during the Corona pandemic. The SVLFG supports them in this. The new web app offers information on working together and accommodation under Corona conditions, accident and health protection and first aid. The FAQ section provides answers to many other questions. In addition, the web app provides emergency numbers.

The content is delivered in German, English, Romanian, Polish, Bulgarian and Hungarian.

The SVLFG calls on employers of seasonal workers to motivate their employees to use the web app in the spirit of good health prevention. The web app is now available via the internet link www.agriwork-germany.de.
